

## SANTA CLAUS

Santa Claus is a fat jolly old man , or maybe an elf, who brings children presents on Christmas Eve. Once a year, he travels all over the world in a sleigh pulled by eight reindeer. He stops at each house where there are good children and slides down the chimney. He puts presents under the tree. If you leave your stocking hanging, he might put small toys or candy in that too. Using Christmas magic he is able to leave presents for all the good boys and girls in the world in only one night! No one knows how old he is or where he comes from. All we know is that he lives at the

North Pole with his wife, Mrs. Claus. Mrs. Claus makes all the cookies and candies and cakes for Christmas. He also has elves that make the toys. Santa Claus has a big list of all the world's children and he watches all year to know who is good and who is bad. He also knows what you want for Christmas. Of course children can write him letters to tell him how good they have been and what they want. He also travels to shopping malls and fairs and stores where he meets children so that they can tell him in person.

### Answer the questions:

1. Where does Santa Claus live?.....
2. What animals pull Santa's sleigh?.....
3. How does Santa enter a house?.....
4. Who helps Santa make toys?.....
5. Where does Santa put presents?.....
